

1. Query for Pull data-for-bi:

```
UW PICO 5.09 File: pulldata-for-bi.py

import pandas as pd
from sqlalchemy import create_engine, text

db_file = "subscriptions.db"

last_n_days = 900

connection_string = "sqlite:/// " + db_file
engine = create_engine(connection_string)

days_ago = "-" + str(last_n_days) + " days"

query = text("""
SELECT *
FROM subscriptions
WHERE start_date >= date('now', :days_ago)
""")

connection = engine.connect()
df = pd.read_sql(query, connection, params={"days_ago": days_ago})
connection.close()

df = df.dropna(how="all")
df.columns = [col.lower() for col in df.columns]

output_filename = "subscriptions_last_" + str(last_n_days) + "_days.csv"
df.to_csv(output_filename, index=False)

print("Saved " + str(len(df)) + " rows to " + output_filename)
print(df.shape)
print(df.head(10))
```
